

To Whom It May Concern

Our company recently supplied a large quantity of Taylors Doors and Frames for a project in PNG. There were 7 shipping containers filled with product. Not only was Taylors pricing the most competitive, the attention to detail, execution of the order and delivery on time more than met our expectations.

The Sydney architects involved remarked to us how refreshing it was to deal with a company so well on top of their game.

We have another light project coming this year in the Pacific and we are informed by the contractor that our pricing is accepted and work will begin in April.

We can highly recommend Taylors Doors and Frames for any requirement of their products that you require.

Yours faithfully
